

BOBY KUMAR KESHRI

SOFTWARE DEVELOPER

+91 8507509448 | bobyk25122000@gmail.com | Portfolio | GitHub | LinkedIn | Noida, UP

PROFILE

I am a Software Developer passionate about building efficient and user-friendly applications. I specialize in Java, SQL, HTML, CSS, and JavaScript, with expertise in OOP, data structures, and database management. I develop responsive and scalable solutions, ensuring high performance and seamless user experiences. Constant learning drives me to stay updated with modern technologies and deliver quality software.

SKILLS

Programming Languages: Java, SQL, HTML, CSS, JavaScript

Core Java Concepts: Object-Oriented Programming, Data Structures Algorithms, Java Collections Framework

Database Management (RDBMS): SQL

Frontend & Web Development: HTML, CSS, JavaScript

- Responsive Web Design (RWD) & Mobile-First Development

Development Tools: Eclipse, VS Code, Git

PROJECTS

HavenStay - PG (Hostel) Booking Website

- Aim:** Simplify PG (hostel) booking with an easy-to-use platform for browsing, comparing, and booking accommodations.
- Description:** A web-based platform built with HTML, CSS, and JavaScript, offering a seamless and responsive user experience. Future enhancements may include payment integration, user authentication, and database management.

Portfolio Website

- Aim:** Showcase projects, skills, and achievements interactively, serving as an online resume for employers and clients.
- Description:** Built with HTML, CSS, and JavaScript, featuring a clean, responsive design for an engaging user experience.

ATM and Bank Account Management

- Aim:** Create a secure Java-based ATM & Bank Management System with essential banking features.
- Description:** Uses OOP, Collections, and Exception Handling for efficient transactions and security.

Shape Calculator

- Aim:** Create a Java-based Shape Calculator using OOP to find the area and perimeter of different shapes.
- Description:** Implements OOP principles (Classes, Objects, Encapsulation, and Polymorphism) to let users select a shape, enter dimensions, and calculate area and perimeter efficiently.
